## Environment, Health & Safety Policy Statement

Precision Polymer Engineering (PPE) is committed to ensuring the health, safety and welfare of its employees, visitors and contractors and striving for zero workplace incidents. We are also committed to minimising our impact on the environment.

PPE Blackburn has adopted the following international standards ISO 45001: 2018 and ISO 14001:2015 as a framework to implement and maintain the integrated Management System for Environment Health, Safety.

To achieve and maintain our commitment we will:

- Comply with legal and regulatory requirements, international accords and IDEX corporation standards.
- Establish and monitor objectives and targets for improving EHS performance
- Prioritise elimination of hazards and where elimination is not possible pro-actively minimising hazards through risk assessment and safe-working procedures
- Provide safe and healthy work conditions, work equipment and adequate facilities
- Mitigate climate change through increasing energy efficiency and renewable energy usage
- Responsibly handle natural resources such as water by implementing actions that will reduce consumption
- Sustain and promote local biodiversity through effective waste management
- Reducing impact on the environment from air emissions and atmospheric emissions such as noise, light, road congestion and traffic
- Reduce harm to the environment by substituting input materials with less hazardous or less toxic alternatives
- Minimise the impact of product use and products end-of life
- Release products that are safe for their intended use
- Review our processes and ensure the most efficient use of energy and raw materials
- Maintain and test our business resilience and recovery plans, so we can successfully deal with potential emergency situations
- Provide information, instruction and training to our employees
- Conduct regular reviews of all aspects of our operations to ensure those standards are being maintained and we meet goals for sustainable improvement
- Select suppliers and business partners with consideration of their ability to run safe and environmentally responsible operations
- Consult with employees on EHS issues and encourage employee participation
- Educate, train and motivate PPE colleagues to work in a safe and environmentally responsible manner
- Foster openness and dialog on EHS matters with our stakeholders both internal and external; communicating risk and performance progress
